Application/Control Number: 09/814,268

Art Unit: 2154

## Art Rejections:

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over <u>Denenberg</u> et al, U.S. pat. No. 5,537,551 in view of Martin, U.S. pat. No. 6,222,942.

Per claims 1-8, <u>Denenberg</u> discloses a system and method for compressing/decompressing communication messages comprising:

a) a processor (49, fig. 1) for compressing/decompressing a communication message,

Application/Control Number: 09/814,268

Art Unit: 2154

b) a receiver (compression) table in communication with said compressor for providing compression information to the compressor for compressing of said communication message,

c) a sender (decompression) table in communication with said compressor for storing substantially similar compression information related to the compression of said communication message (see col 15, lines 60-63 and col 17, lines 38-59).

Denemberg also teaches that both compression and decompression tables can be maintained within the subscriber device for enabling compressing and decompressing capability at the client device (see col 16, lines 12-16).

Denemberg does not teach using a plurality of dictionary tables in communication with compression/decompression tables.

Martin discloses a method of compiling a plurality of static/dynamic dictionary tables for storing frequently used words (see Martin's col 3, lines 4-28).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify <u>Denenberg</u> with <u>Martin's</u> teaching because it would have enabled implementing message compressing/decompressing more effectively on a mobile device (<u>see Martin's col 1</u>, lines 54-62).

Per claims 9-10, <u>Denemberg</u> also teaches providing an indication (flag) within the message to indicate whether or not

Art Unit: 2154

the message should be compressed by using the compression table (see Denenberg's col 32, lines 34-47).

Claims 11-24 are similar in scope as that of claims 1-10.

## Allowable Subject Matter:

4. Claims 25-35 are allowed over prior art of record.

## Conclusion:

- 5. The references cited by the examiner on PTO-892 but not relied upon are considered pertinent to applicant's disclosure.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Vu whose telephone number is 703-305-9597. The examiner can normally be reached on Monday through Thursday from 8:00am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee, can be reached on (703) 305-8498.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is 703-305-9600. The Group fax number is 703-872-9306.
